 SGT SMITH, CHRIS WVNG

Volunteer Instructors from Microsoft, Dell, and AT&T and National Guard

Testimonials

This was a great opportunity and I intend to make the most of it. The MS certifications will really help me as I transition to civilian employment.

Thanks this training has been great. I hope many other wounded warriors are able to take advantage of this opportunity. This computer is going help me a great deal in my current and future classes at the university of Maryland and at perusing my second major in Homeland Security. Thank a lot to: You, your organization, and your team of Microsoft and Dell
Believe me this is greatly appreciated

Thank you and Americas adopt a soldier for your generosity and effort to continue to assist us warriors with our transitioning process. These laptops and educational opportunities serve great purposes in both the civilian and military world. I will be certain to take full advantage of all that you and your sponsors provide to us. Thank you Mary, n god bless your hearts.

Testimonials

“Thank you for all your help and to the people from Microsoft and Dell and Sprint for all there time with use showing use how to get started on our new computers. I hope that the military keeps up the program for other soldiers who are coming in to go to this program. Again thanks for all your help. SFC Young, Army “

“It was really great learning about computers and learning about Microsoft products and getting more learning time on computers. It should be offered to other wounded warriors to help them become more market able. Thanks for everything. SPC Chapman, MANG”

“I really enjoyed the class and learned a lot about the Microsoft office. I believe that this program should even be offered to soldiers who aren't wounded. I see myself using what was taunt and what I'll learn. The only suggestion I've got is that maybe on the first day make it a little bit longer just incase the internet problem/s happens again. Thank you for this opportunity. SPC Landowski, GANG”
